Ivanov Pavel

Front End Developer

grammka@gmail.com   github.com/grammka   linkedin.com/in/grammka

I have 6+ years experience in creating complex single-page applications as well as general website front-end. I know full web technology stack build process and how to make web apps faster. I have a solid experience in web design, which means that I can successfully handle projects that require professionals from two different fields - design and programming.
